

COMPOSITE INDUSTRY NATIONAL CONFERENCE 2023

Industries meet the Experts on 4th & 5th July 2023 at Ahmedabad, India

CINC 2023 provides a forum for Composites Industry, Expert, and Academia to share ideas and approaches, showcasing world-leading manufacturing research for advanced composites, recognizing, and responding to the growing composite industry needs.

The conference offers a mix of keynote papers presented by internationally renowned experts, Panel discussions, one-to-one interaction between industry and subject matter experts, specialists, and presentations chosen from peer-reviewed abstracts, all of which will cover a diverse range of industry sectors.

The event will be a great opportunity for those across the composites manufacturing supply chain to learn more about the latest research and how they can contribute to the development and expansion, and the opportunities available.

The conference will have a unique emphasis on networking and building new relationships, including generating dialogue in technical know-how for all verticals of composites manufacturers like automotive, aerospace, defense, mass transport, and renewable energy like wind, solar, and green hydrogen energy. There will also be an opportunity to integrate with allied industries and supply chains to demonstrate an insight into new innovations in advanced materials for various composite applications.

Presentations that focus on FRP, GRP, CFRP, Graphene, and advanced composites, as well as case studies on new technologies and new market data, for current and upcoming manufacturing

initiatives, are of particular interest to this conference, along with other relevant topics of timely interest.

Please consider participating in what is certain to be a highly productive experience with an opportunity to collaborate with industry experts in this fast-evolving market.

Call for Industry Presentation

If you would like to be a speaker at this event, please contact cecaasia@gmail.com, subject heading "Call for Papers - CINC 2023".

Who should attend?

Core attendees include CEOs, COOs, CFOs, Presidents, Vice Presidents, Directors, Heads of, Superintendents, Managers, and Stakeholders involved in:

Lightweight Materials	Equipment Design and Manufacture	Materials Sourcing and Advisory
Plastics & Composites	Composite Manufacturing	Nanomaterials and Technologies
Parts Procurement	Raw Materials Sourcing	Research and Development
Composite Mfg. Technologies	Lightweight Engineering	Strategy, Projects & Public Affairs
Advanced Materials	Cost Reduction Strategies	Legal & Compliance Work
Advanced Engineering	Material Specifications	Purchasing and Sourcing
Automotive Technologies	Sales and Marketing	Equipment Certification Services
Vehicle Body Manufacturing	Business Development	News Reporting and Journalism

Benefits of Attendance

CINC 2023 Conference is the only event of its kind to deliver leading market intelligence and industry presentations on the latest innovations in Composites and advanced composite materials applications in India.

- Two days of in-depth presentations revealing the very latest market intelligence towards our key focus on sharing results and industry experiences.
- Exclusive networking opportunity, a chance to engage with other professionals with shared challenges and experiences in past and current lightweight automotive projects.
- Updates on regional projects and research led by leading vehicle manufacturing experts detailing their experiences, findings, and new proposals.
- Technical presentations from service providers showcasing the latest results from recent tests and trials, technological developments, and new technical know-how.
- New case studies on specific examples from leading industry experts in plastics and advanced composites for automotive components.
- Unique opportunity to integrate with a multitude of industry stakeholders and to explore new techniques for overcoming the challenges of the lightweight automotive components market.
