COMPOSITES EXCELLENCE CENTER OF ASIA

ABOUT US

The Composite Excellence Center of Asia (CECA) is a leading hub of innovation, established by a team of distinguished experts from the composite industry, academia, and research institutions. With support from specialists in ceramics, chemical engineering, mechanical engineering, polymer technology, materials science, design engineering, and geology, CECA offers a holistic approach to composite processing and control, driving advancements across the entire value chain.

MISSION

Committed to improving the everyday operations of composite manufacturing professionals across Asia, CECA leads the way in driving Lean Techno-Commercial Business Transformation, optimizing processes, and fostering continuous innovation in the industry.

VISION

Partnering globally with a visionary team of passionate and skilled technology leaders, CECA is dedicated to shaping the future of composites by anticipating and exceeding the industry's evolving needs and expectations.
